WHAT WE DESIGN TODAY SHAPES 2030

2030 is just around the corner. **Sustainability** is becoming the standard.

Architecture and interior design are entering a new era in which sustainability is no longer an added value, but **an integral part of how we design, select materials, renovate existing buildings, create interiors and demonstrate the quality and performance of a project.**

New European regulations, carbon reduction, circular construction, reuse, design for disassembly, secondary raw materials, Digital Product Passports, biodiversity and climate adaptation are rapidly becoming part of the everyday work of architects, designers and manufacturers.

The Design District Conference 2026 asks a simple but important question:
What will architectural and interior design practice look like in just a few years – and are we ready for the changes already underway?

As part of the Design District fair, the conference will once again bring together leading experts from Croatia and across the region, and we invite you to put your brand in front of this professional audience.

WHY PARTNER WITH US?

Becoming a partner of the Design District Conference gives your brand visibility among conference delegates and Design District visitors, while also creating a direct connection with the professionals shaping projects from their earliest stages.

CHOOSE YOUR PARTNERSHIP FORMAT.

Four partnership options – from a focused conference presence to broader visibility across both the conference and the fair.

The scope can be tailored to your topic, product, audience, budget and communication objectives. Final format and content are agreed according to the actual scope of the partnership. The topic and format are developed together to ensure maximum relevance for the audience and a strong fit between your brand and the conference programme.
